React-2

React -2 Agenda

1. Create react app (CRA)
1.1. Definition
1.2. Practical usage
1.3. Q&A session #1
2. List and Keys
2.1. How to render an array of elements
2.2. Kyes. What and why
2.3. Usage examples
2.4. Q&A session #2
3. Chrome DevTools
3.1. Inspect DOM elements
3.2. Console overview
3.3. Dubber
3.4. React developer extension
3.5. Q&A session #3

Create React App

Create React App is an officially supported way to create single-page React applications. It offers a modern build setup with no configuration.

Let's code!

https://create-react-app.dev/docs/getting-started/#selecting-a-template

List and keys

To manipulate an array of data you can use the JavaScript array methods. In most cases, you will use a map or filter method because they don’t mutate the original array and can be used to create a new one with JSX elements inside it.
