React 5 – React Patterns

Agenda

- Higher-Order Components (HOC)
- Compound Components
- «Slots»
- Render Props

Higher-Order Components

Higher-Order Components (HOC)

“a higher-order component is a function that takes a component and returns a new component.”

<https://reactjs.org/docs/higher-order-components.html>

Compound Components

Compound Components

Two or more components working together to accomplish a common task.

<https://kentcdodds.com/blog/compound-components-with-react-hooks>

«Slots»

Render Props

Render Props

A component with a render prop takes a function that returns a React element and calls it instead of implementing its own render logic.

<https://reactjs.org/docs/render-props.html>
